Township 33^N in Range 8 west of the 2nd
principal meridian is principally prairie
good Soil & well watered & well adapted
to production of grain of the various kinds
raised in the western country A lack

T. 33 N. R. 8 W. 2nd Mer. Ind^{ea}

of timber prevents from being a first rate Township of land a sufficiency of timber however can be had in the adjoining Townships to make a settlement of this Township practicable. Several advantageous settlements can be made in the groves in the Townships, the marshes along the brooks and creeks and also the large marsh on the South end of the Township are covered with an excellent grass called "red top" which yields an almost unparalleled crop the grass being in some places six feet high and would make good hay.

I hereby certify that in pursuance of a contract with Mr. T. Williams, Surveyor General of the United States, for the States of Ohio and Indiana and the Territory of Michigan bearing date the 3rd day of May, 1834 and in strict conformity to the Laws of the United States and the Instructions of the said Surveyor General I have surveyed & subdivided into Sections Township No. 33 North in Range No. 8 West in the State of Indiana and I do further certify that the foregoing are the true and original field notes of the said survey & subdivisions executed as aforesaid this 21st day of July 1834
